

Health *efx* vClips

INTERACTIVE HD VIDEO KIOSK

Our vClips Video Kiosk is an interactive application which allows users to easily browse and view video clips as well as Microsoft PowerPoint slides using a simple touch screen interface. This solution is ideal for disseminating facility information, patient or staff education, and messaging through on-demand playback. vClips combines the highest quality video and graphics output with simple and flexible management tools. vClips can be installed as a standalone application, or combined with our HEALTHefx platform to create a powerful digital communication network.
